

ABDUL SAMAD CHISHTI

Backend Developer

Bahawalpur, Punjab, Pakistan • +92 345 3100484 • abdulsamadchishti07@gmail.com
Portfolio: abdulsamadchishti.dev | GitHub: github.com/abdulsamadchishti07 | LinkedIn: linkedin.com/in/abdulsamadchishti07

PROFESSIONAL SUMMARY

BS Information Technology student with hands-on backend development experience across internships and three independently built REST API projects using Python, Django, and FastAPI. Comfortable with PostgreSQL, Redis, Docker, and JWT-based authentication. Looking for entry-level backend developer roles, internships, or part-time opportunities.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Django, Django REST Framework, FastAPI
- **Databases & Caching:** PostgreSQL, Redis, SQL, Django ORM, Alembic (Database Migrations)
- **Architecture & Security:** REST API Design, Microservices, JWT Authentication, Role-Based Access Control (RBAC), Distributed Locking
- **DevOps & Tools:** Docker, Docker Compose, Git, GitHub, Linux, Postman, Pytest

PROFESSIONAL EXPERIENCE

Software Development Intern | MoizTechHub (Jul 2026 – Aug 2026)

- Built TaskFlow API, a multi-tenant task/project management REST API with FastAPI – implemented JWT authentication, workspace-scoped role-based access control (owner/admin/member/viewer).

Backend Trainee | Enigmatix | Bahawalpur, Pakistan (Aug 2025 – Dec 2025)

- Trained in backend web development with Django and Python; built and tested REST APIs.
- Worked with database modeling, HTTP request lifecycles, and a collaborative production codebase.

Business Development | WebXMeta | Bahawalpur, Pakistan (Mar 2025 – Jul 2025)

- Handled business development, lead generation, and client communication in an IT agency.
- Collaborated cross-functionally between technical and non-technical teams.

TECHNICAL PROJECTS

Event Booking & Ticketing API (In Development) | FastAPI, PostgreSQL, Redis, Alembic

- Architecting a concurrency-safe event reservation system engineered to eliminate race conditions and double-booking using Redis distributed locks and PostgreSQL row-level transactions (FOR UPDATE).
- Implemented robust security features including Role-Based Access Control (Admin/Seller/Buyer), account lockout protection against brute-force attacks, and secure JWT refresh token rotation.

Multi-Tenant Project Management API | FastAPI, PostgreSQL, Redis, Docker, Pytest

- Developed a multi-tenant task and project management REST API with Redis layer caching for high-frequency queries and per-tenant rate limiting.
- Established automated testing suites using Pytest and Postman; managed database versioning and seamless schema migrations via Alembic.

E-Commerce Backend Platform | Django, PostgreSQL, Docker, Docker Compose

- Built a backend service supporting OTP verification, Google OAuth sign-in, product catalog management, shopping cart operations, and order processing.
- Containerized application environments using Docker Compose to ensure consistent local development and streamlined deployment workflows.

EDUCATION

The Islamia University of Bahawalpur (IUB) | Bahawalpur, Pakistan

Bachelor of Science in Information Technology (BS IT) Expected Graduation: 2028

CERTIFICATIONS

- **Google IT Automation with Python Specialization** – Google | Issued Dec 2025
- **Google AI Essentials** – Google | Issued Nov 2025
- **Google AI** – Google | Issued Sep 2026
